

Budget guidance:

The board of Danish Conductors Association sometimes receives applications where the acquired budget does not supply us with the necessary information in order to process the application. That makes it difficult to treat the application right. The application will in this case be rejected, until a correct budget is received.

Please find the guidelines for making a proper application below.

- The budget must be specified, in a way that all income and expenses can be viewed clearly. Everything must be stated separately - not only the final sum. Income for every concert, every part of a recording etc. must be stated separately. Each expense must also be stated separately.
- The musician fees need to be specified for each individual musician.

Don't forget to include your own salary. Please state what you earn or count on earning.

If you use a certain amount of money from a larger grant that you have received from another source, it is helpful for our board to know the specifics of this budget. Please provide this information if possible.

- Remember to specify other places where you have applied for funding. In this case, please state the amount you have applied for, and the amount you have received. Also, in this case, remember to state the difference between de facto income and expected income.

Best regards from the board of Danish Conductors Association
